Positive Start to Seismic Operations

Range Resources Limited (**ASX: RRS, AIM: RRL**) ("Range" or "the Company") the oil and gas explorer with assets in Puntland, is pleased to announce that it and its joint venture partner Africa Oil Corporation have made a positive start to the commencement of seismic operations in the Dharoor Valley (northern Puntland). Approximately 2,600km of high quality 2D vibroseis will be acquired as part of a comprehensive programme of exploration work in the region.

Key milestones achieved to date include:

- a) Establishment of onsite camp and operational facilities;
- b) Successful liaison and communication initiatives with local communities and clans; and
- c) Successful arrival of seismic equipment at Bossaso Port.

Various photos of the seismic mobilisation are shown below. Shareholders should also note that selected media reports of equipment under attack and the use of a private militia are grossly inaccurate.
